

# NOTIFICATION OF PROPOSED WIND ENERGY PROJECT

Elemental Energy is investigating a new wind energy project near the town of Parrsboro and within the municipal boundaries of Cumberland.

The proposed project is being investigated as a candidate project for Nova Scotia's recently announced renewable energy procurement opportunity, the Green Choice Program.

In the coming weeks we will be initiating engagement activities with the Mi'kmaq of Nova Scotia, local communities, stakeholders, and local government representatives.

For more information on Elemental Energy, and our renewable energy projects in Nova Scotia and across Canada, please visit our website.
